

IMMANUVEL A

Software Developer | React · Next.js · Python · AI | Information Security
+91-8248754186 | immanvj077@gmail.com | github.com/imman077

PROFESSIONAL SUMMARY

Software Developer with 1 year of experience designing and deploying full-stack web applications, AI-powered systems, and secure REST APIs. Proficient in React.js, Next.js, Flutter, FastAPI, and Node.js with hands-on expertise in building RAG-based document assistants using LangChain, LangGraph, and Qdrant. Strong Information Security foundation combining modern database architecture (MongoDB, Redis, Qdrant), vector search, and cryptographic principles to deliver scalable, high-performance, and intelligent solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frontend: React.js, Next.js, Flutter, Tailwind CSS

Backend: FastAPI, Flask, Node.js, Express.js

Databases: MongoDB, MySQL, Redis, Qdrant(Vector DB)

Security & Tools: Cryptography, Application Security, Git, Docker, Postman

PROFESSIONAL EXPERIENCE

Software Developer | Appikorn Software Consultancy | Jul 2025 – Present

- Developed full-stack web applications using React.js, Next.js, and Flutter; built and maintained GraphQL APIs integrated with MongoDB backend services.
- Engineered features for an insurance management system and mentored 2 junior developers on frontend implementation best practices.

PROJECTS

Cloud Security, Encryption & Activity Monitoring Systems | Tech: Python, ECC, EdDSA, JavaScript, MySQL, Blockchain

- Built a two-phase cloud security framework integrating ECC/EdDSA encryption with blockchain-based key management, featuring a full-stack MySQL web interface and real-time cryptographic validation with comprehensive performance evaluation.
- Developed a Python-based keystroke monitoring system with automated email logging and behavioral analytics. Implemented access control monitoring and vulnerability assessment for comprehensive threat detection and security analysis.

Food Donation Platform | Tech: React 19, TypeScript, Vite, Zustand, Tailwind CSS, Node.js, Express, MongoDB, GraphQL (Apollo), Mongoose, Leaflet, Recharts

- Developed full-stack food donation ERP with React 19/TypeScript frontend, Node.js/Express backend, and dual GraphQL/REST APIs; implemented 4 role-based portals with real-time tracking, geospatial maps, analytics dashboards, gamification tiers, and automated reward seeding for eliminating food waste at scale.

Aura – AI-Powered E-Commerce Platform | Tech: Flutter, Next.js, NestJS, FastAPI, MongoDB Atlas, Redis, LangChain, Socket.io, Stripe, Razorpay, Firebase

- Developed full-stack e-commerce ecosystem combining Flutter mobile app, Next.js admin dashboard, NestJS REST backend, and FastAPI AI microservice with vector search, LLM chatbot, real-time tracking, and multi-region payment integrations.

Claw Dev Pricing Estimator | Tech: React, Node.js, MongoDB, Redis, Telegram Bot API, jsPDF

- Built a full-stack React web portal and Telegram chatbot that generate dynamic project quotes with automatic PDF estimates, localStorage tracking, and 30-day quote retention via MongoDB TTL indices.

AI Document Assistant (RAG) | Tech: React.js, FastAPI, Python, LangChain, LangGraph, Qdrant, Gemini API

- Developed an AI-powered document assistant using RAG for contextual question answering from PDF and Word documents.

EDUCATION

M.Tech – Information Security (CSE) — Puducherry Technological University

May 2025 | CGPA: 8.20

B.Tech – Computer Science & Engineering — Christ College of Engineering & Technology, Puducherry

Aug 2023 | CGPA: 8.17
